

# Technical Update

## **Deadline for Receipt of Records of Site Condition under the Guideline for Use at Contaminated Sites in Ontario**

### **Introduction**

The purpose of this update is to advise property owners, consultants and other interested parties of the deadline for submitting RSCs under the Guideline for Use at Contaminated Sites in Ontario, June 1996, and later revised (Cleanup Guideline 1996). The process described in the Cleanup Guideline 1996 will be replaced by the requirements as set out in Part XV.1 of the *Environmental Protection Act* (EPA) and the Record of Site Condition Regulation (O. Reg. 153/04). This new process comes into effect on October 1, 2004.

### **Deadline for Receipt of an RSC under the Cleanup Guideline 1996**

Any RSC to be acknowledged by the Ministry of the Environment (MOE) under the Cleanup Guideline 1996 must be received by MOE by September 30, 2004. These RSCs should be submitted to the appropriate MOE District or Area Office.

### **New Process for Filing an RSC under Part XV.1 of the EPA**

Under the new process set out under Part XV.1 of the EPA, RSCs are to be filed electronically in the Environmental Site Registry. Watch this site for information on the new filing process.
